

Mobile Inspection for Tablet

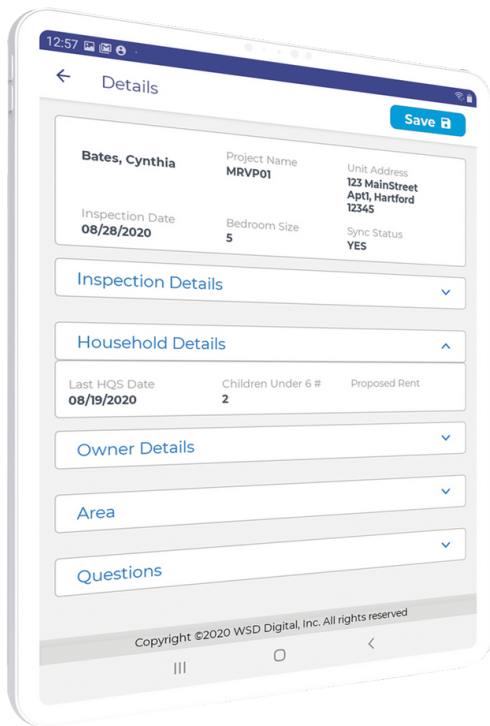

SaaS solution for mobile inspections for the housing industry built on React-Native technology with one single code base for both Android and Apple devices.

Standard Features

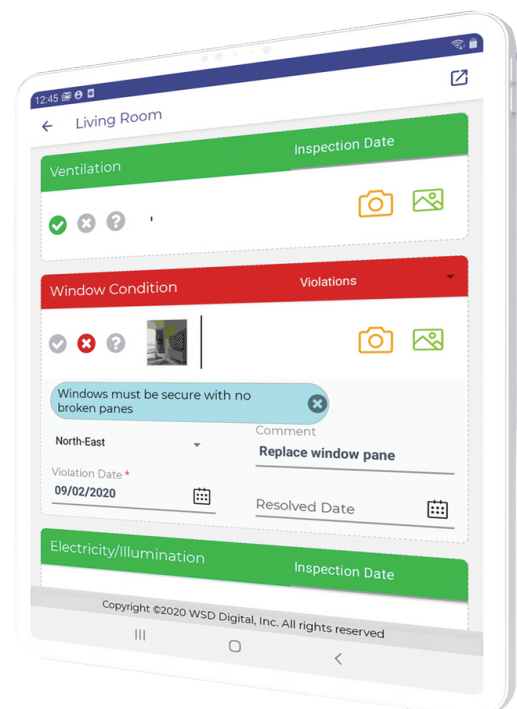

- ▶ Supports both Android and iOS operating systems
- ▶ Configurable Inspection Checklist templates support any domain
- ▶ Integrates with any Section 8 tenant management application through the Mobile Inspection API
- ▶ Dashboard displays inspector's daily scheduled inspections

- ▶ Auto-sync to "ReFrame Inspection Admin" application keeps everything up to date
- ▶ View and update inspection, owner, and tenant details and configure questions
- ▶ Inspection checklist items organized by areas, allowing the user to indicate pass/fail/inconclusive items. Enter violations, comments, take photos with the tablet camera, and attach them to the inspection checklist item

- ▶ PDF inspection checklist reports that can be emailed to the property owner directly from the tablet
- ▶ Supports both offline and online processing
- ▶ Manage Fixed Assets with Barcode or QRcode scanning
- ▶ Flexible subscription pricing
