

# Streamlining Attendance and Parent Notifications

Achieving Educational Excellence with  
ReFrame Engage Check-In

ReFrame Engage Check-In transforms attendance and communication insights by providing real-time SMS notifications to parents and guardians when a student has checked in to school. Schools can efficiently take attendance both in the classroom and at any after-school activity, while parents stay engaged with instant attendance updates as needed. This reinforces active parental involvement in their child's educational journey.

## What the education system needs?

In a rapidly changing world, the education system needs solutions that are:

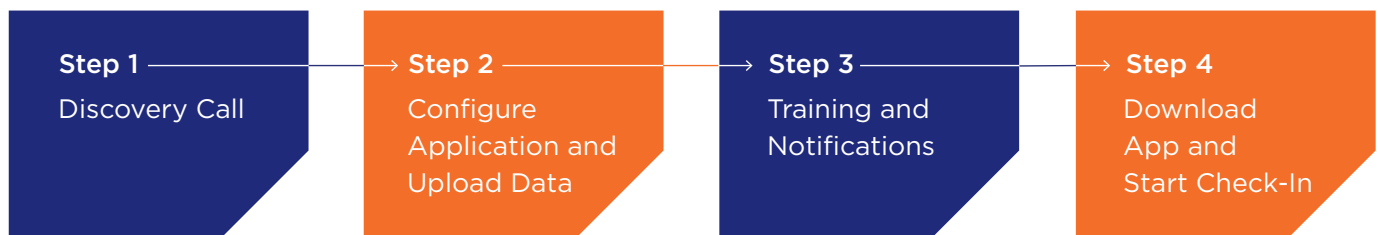

- 01 Accessible**  
Easy to implement and user-friendly
- 02 Integrated**  
Hyper-personalized communication
- 03 Frictionless**  
Streamlined operations
- 04 Data-Driven**  
Informed decision-making
- 05 Engaging**  
Fostering active student participation

In the **2021–22** school year, almost 14.7 million students, accounting for 29.7% of the total, were chronically absent.\*

In the **2022–23** school year, 11 states that provided attendance data recorded a collective chronic absenteeism rate of 27.8%.\*

## How to Get Started in 4 Steps ?

 **Empower**  
Students check in with a swipe or scan of their ID.

 **Embrace**  
Parents are instantly notified about student arrivals, absences, or lateness.

 **Experience**  
360° view of students' data for better educational experience.

# Benefits for K-12 Education

- 01 Efficient attendance tracking facilitated through streamlined ID swipe technology.
- 02 Instant notifications sent to parents in real-time for prompt updates.
- 03 Teacher class rosters managed effortlessly, saving time and resources effectively.
- 04 Simplified parent-teacher appointment scheduling for efficient communication.
- 05 Automated notifications for arrivals, late check-ins, absences, and after-school activities.
- 06 Customized student arrival times offered, ensuring flexibility and adaptability.
- 07 Comprehensive multi check-in system implemented for accurate attendance records.
- 08 Enhanced reporting features tailored for administrators, staff, and parents alike.
- 09 Real-time visibility into attendance patterns enables data-driven decision-making processes.
- 10 Proactive communication to parents about absentees, tardiness, and attendance discrepancies.

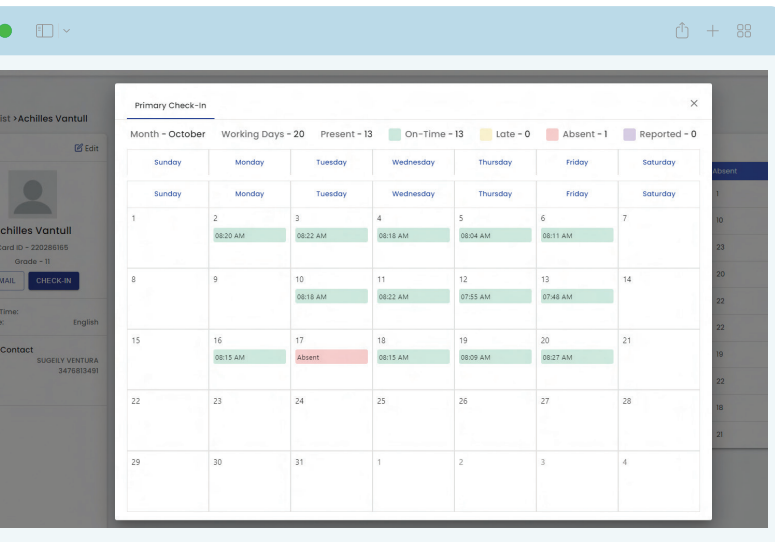

## Student records for comprehensive data management

Each student has a record in the system with their appropriate parent or guardian contact information, and the system can capture custom data fields on the 'type' of student, such as grade, and custom check-in times.

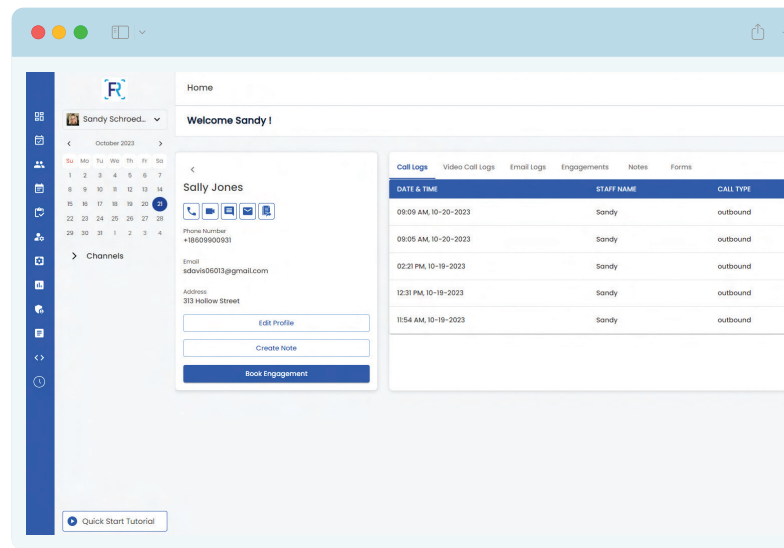

## Student attendance for enhanced record accessibility

A student record is accessible with attendance reporting and profiles of parents or guardians, while the system enables sending SMS text or email messages to parents, guardians, faculty, teachers, and staff.

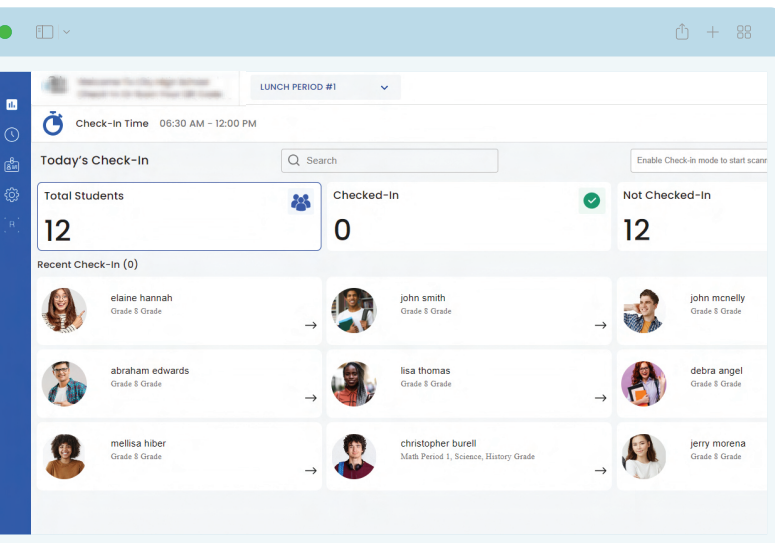

## Message logs for real-time student check-ins and instant parent notifications

SMS Text Logs offer real-time tracking of student check-ins and instant custom SMS notifications to parents when students arrive, simplifying attendance management for teachers and ensuring timely communication.

## Check-In per classroom to streamline student management

School faculty members can log in and access a drop-down menu displaying their student roster for specific class subjects and times. Teachers and staff are then presented with the choice of either utilizing the mobile app for scanning or directly checking in on the students from within the application.

## Custom teacher roster workspace for personalized educational environments

The Configuration Screen empowers school administrators, faculty, teachers, and staff by enabling them to personalize their classroom and roster workspaces, fostering a tailored and efficient educational environment.
